

# OVERPOPULATION

# Degrading the Earth to a global slum?

The non-wanted pregnancies are a natural disaster, "sexual disease". It causes large numbers of child and maternal deaths, if the mother has recently given birth, is ill, too young, too old, too weak, overburdened with work, children, travelling, building, taking care of the elderly, etc.

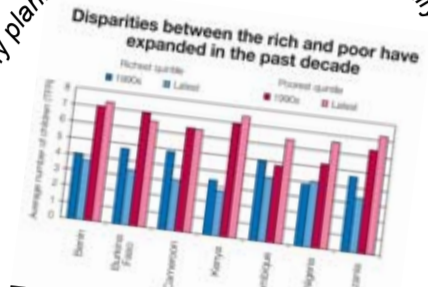

Where a woman gives birth to 4 times more children during her life, child mortality increases twenty times.

Children born within 18 month after previous birth have three times higher mortality rate.

Until man is only halfway between animals and humans with regard to the usage of its reproduction ability, the fate of humanity is also partly like the one of animals. Until man does not control its population, hunger, diseases and wars will.

Why is family planning a privilege of the rich, especially in the poor countries?

The gap between the rich and poor has grown in the number of children too.

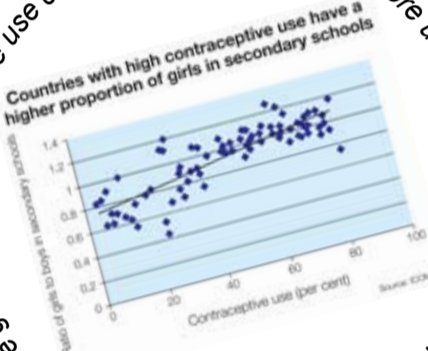

Only wanted children - and wanted for themselves - be conceived, so that when grown up, they feel to have gotten the best possible parents, place and era to live in.

Every minute 380 woman gets pregnant, and at least half of these pregnancies happen against the couple's intention.

Contraceptives are way too expensive. An African man receives 4 condoms as grants a year. 80 percent of the poor is in lack of tools therefore can not plan their families.

where more girls go to school, more use contraceptives → where more use contraceptives, less girls have to miss school

"the angel circle"

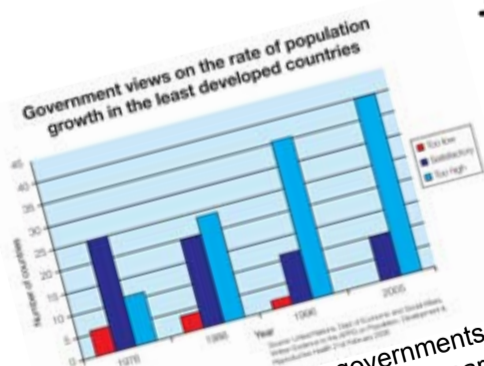

Reproductive health is a human right!

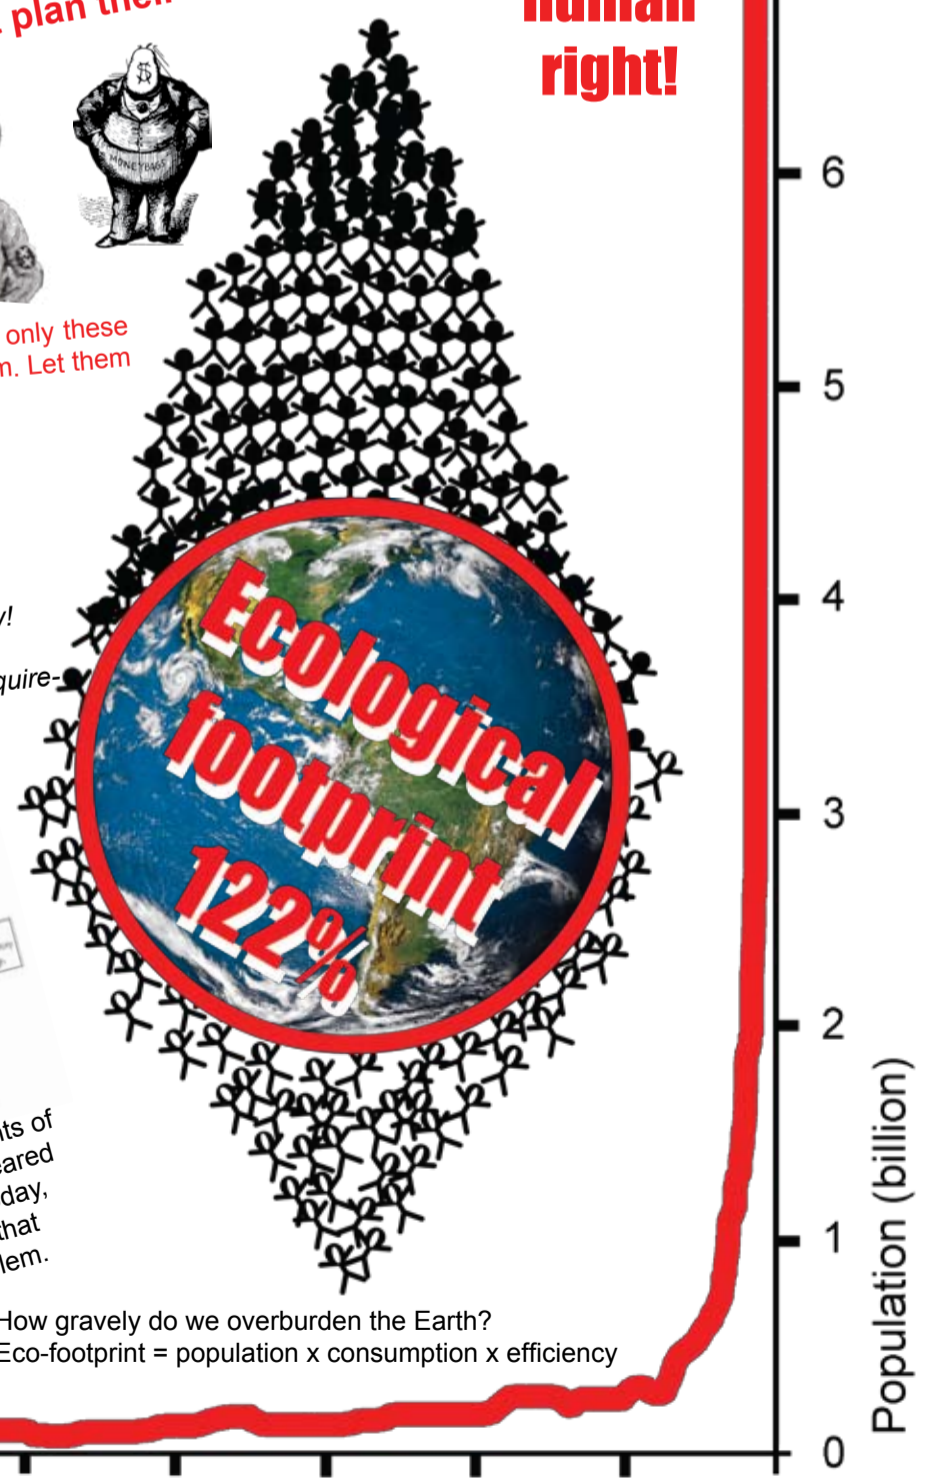

"the Satan, after making the first woman eat the apple, thought: if only these two humans will live in the world, I will live very modestly from them. Let them be thousands of millions instead. Then I will get some comfort." (Mór Jókai: A kőszívű ember fiai)

More slaves! Higher pyramid of society!  
 More soldiers! More imposing ceremonies, stronger empire!  
 More workers! More tax payers! More profit! More unemployed to break down wages, labour rights and environmental regulations!  
 More believers! Bigger sacred squares, more influential hierarchy!  
 More consumers! More viewers, bigger triumph!  
 Let non-reproductive sex be a taboo and population growth a requirement! Who does overpopulation harm? Let the useless perish!

"Mother Culture always claims for the increase of food production for today - and just promises birth control for later" (Daniel Quinn: Ismael)

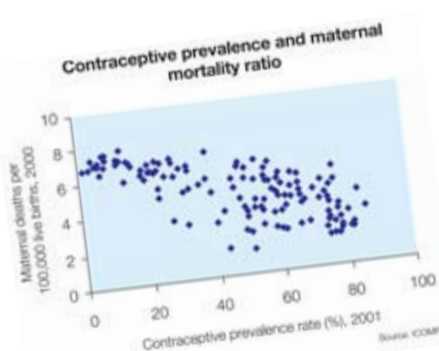

The population forcing governments of the poorest 50 countries disappeared only around the millennium. Today, 80 percent of them realized that overpopulation is a big problem.

How gravely do we overburden the Earth?  
 Eco-footprint = population x consumption x efficiency

Source of data and photo: RETURN OF THE POPULATION GROWTH FACTOR Its impact upon the Millennium Development Goals Report of Hearings by the UK All Party Parliamentary Group on Population, Development and Reproductive Health (31th January, 2007).

Where the rate of contraceptive users is four times lower, maternal mortality is four times higher.

"... in all the discussions during the past year on how to lift Africa out of poverty, the question of population has been conspicuous for its absence. It is no longer fashionable or politically correct. In some circumstances population growth can be a stimulus to economic development' but in others the reverse is true." John Blacker, Centre for Population Studies, London Letters to The Independent, 23rd January, 2006

Everyone has the right to be educated about the challenges of globalization!
